

MATTEO CIOCCA

Job Title: Product Owner | **Highest Education:** PhD in Robotics, Grenoble (2020)

Location: Paris, France (Open to relocation) | **Language:** Italian, French, English

Contact: Upon Request | **Web:** [linkedin.com/in/matteociocca](https://www.linkedin.com/in/matteociocca), teoka.github.io

SUMMARY

Product Owner with 5 years of experience delivering B2B software and technical products in international environments. Experienced in product strategy, roadmap ownership, cross-functional leadership and translating customer needs into scalable technical solutions. Strong engineering and data background, bridging customers, business and R&D teams.

PROFESSIONAL EXPERIENCE

Product Owner - BWI, Paris (2026 - Present)

BWI is a B2B SaaS company providing hydrological monitoring and forecasting solutions for river discharge and water levels.

- Own the product roadmap and backlog for a B2B SaaS hydrological platform serving 9 clients, balancing customer needs, business priorities and technical constraints.
- Translate customer and business needs into product requirements, assessing technical and functional feasibility and allocating R&D capacity across features and projects.
- Coordinate a 14-person cross-functional team across full-stack/inference, hydrological modelling, data, satellite image processing and DevOps, aligning customer, business and technical stakeholders.
- Manage the end-to-end product lifecycle, from discovery and prioritization to validation and release, driving major platform releases and key product features.

Product Owner - BWI, Paris (2021 - 2026)

Owned a software product within a larger industrial platform used to personalize payment and identity cards.

- Owned the roadmap and lifecycle of a software product supporting the personalization of 1M+ payment and identity cards annually.
- Coordinated a 5-person technical team and collaborated with 10+ global business, industrial and technical stakeholders across France and Asia.
- Defined and prioritized product requirements across deployment, monitoring and UI/UX capabilities, balancing factory operations, customer needs and technical constraints.
- Reduced software provisioning time onto card chips by 75%, improving factory throughput and operational efficiency.

R&D Engineer - IDEMIA, Paris (Nov 2020 - Oct 2021)

- Led the winning IDEMIA Innovathon project, developing an industrial approach that reduced the environmental impact of chip-card production by up to 80%.
- Led a CBDC innovation project with ConsenSys, coordinating an international multidisciplinary team for the Monetary Authority of Singapore Global CBDC Challenge.
- Developed Python/Java test automation tools, reducing test development and execution time by up to 50%.

Researcher - INRIA, Grenoble (Mar 2017 - Sep 2020)

Conducted research on optimization for autonomous systems, publishing 3 scientific papers in robotics.

Research Intern - IIT, Genoa (Apr 2016 - Oct 2016)

Improved actuator torque estimation for the iCub humanoid robot, estimation algorithms and real-time simulations.

Intern - perClass, Delft (Sep 2014 - Dec 2014)

Improved a machine-learning classifier for spectral imaging and presented the solution at international trade fairs in Munich and Eindhoven.

SKILLS

Product: Product Strategy, Roadmap & Backlog Management, Prioritization, Product Lifecycle, Requirements, Agile/Scrum, Stakeholder Management, Release Planning

Technical: Python, C++, Git, Jira, APIs, Cloud/DevOps Concepts, Data Analysis, Machine Learning

Leadership: Cross-functional Coordination, R&D Capacity Planning, Customer Workshops, International Stakeholder Management

TRAINING & CERTIFICATIONS

Cross-Functional Manager, Team Manager (CEGOS), AI for Product Management, Power BI, Business Plan, Financial Accounting (Coursera)

VOLUNTEER EXPERIENCE

Paris City Lead - Italian Professional Network (2025-2026) Organized professional networking events in Paris.
